

# “Teaching Innovation in Andalusia: Professionalization through Reward Policies and Database Management”

Dr. Pilar Romero (PhD in QA, AGAE),

Dr. Carlos Marcelo. In charge of the Department of Education and Quality  
in AGAE)

Organization: AGAE (Agency for QA in HE and Research in Andalusia)

# Changes in European Universities

- curriculum reform,  
structure of university degrees,  
procedures for university access,  
monitoring, evaluation and  
accreditation of new programs

AND

teaching and student learning in the classroom

# REFORMS IN EDUCATION

INNOVATIONS

BOTTOM

# SUPPORTING INNOVATION IN UNIVERSITIES

- It is important, to support the educational processes of innovation that the teaching staff at the universities starts and develops.
- The functions of an accrediting agency should not be limited to external evaluations,
- but should provide a better environment for innovation and change in universities.

# PROMOTING AND SHARING TEACHING INNOVATION IN UNIVERSITIES

- A  
U  
C  
C
- T  
S

# The conference was structured around the themes of:

- multilingual teaching,
- evaluation of competencies,
- ICT-based teaching methodologies,
- procedures for welcoming and orienting students,
- strategies to spur students' participation and
- structure and style of master's theses.

It included workshops, roundtables, presentations, lectures and symposia

# A Prize to the best projects

- In addition, prizes were awarded (I Premios a la Innovación Docente en Andalucía) to the three best projects on innovation by a Committee formed by knowledge-authorities in QA.

# Professionalization and Social Recognition Bring Professional Value

- AGAE's staff organized and conducted the whole enterprise
- two types of competencies:
  - Diagnosis
  - Networking.

# The competence of diagnosis

- I was acquired through:
  - Regular contact (formal and informal) with AUPA, the Association of Public Universities in Andalusia in charge of implementing the region's plan of innovation and modernization.
  - Training in seminars, courses, meetings and conferences on the processes of innovation and change
- Provided the staff with the knowledge to appraise the areas that needed to be addressed in the course of the conference and helped structure the event accordingly.

# The competence of networking

- the instrumental ability of planning, coordinating, using technologies and communicating in formal contexts
- It was acquired through the previous organization of Conferences and Seminars at an international level and,
- through the staff's daily activities in the fields of evaluation and accreditation which certainly require organization skills.

# Professions and professionalization

Structural attributes of professions identified in the literature include:

- Creation of a full time and paid occupation.
- Establishment of a training school.
- Formation of a professional association.
- Support of law (i.e., legal recognition of title and/or work activities).
- Formation of a code of ethics (Wilensky 1964).

# Attitudinal elements

- The use of the professional organization as a major referent.
- Belief in service to the public.
- Belief in self-regulation.
- Sense of calling to the field.
- Autonomy.

# Professionalization in QA

- QA can be defined as a well-established profession
- its associations have authorized qualifications and standards require a set of competencies and abide by a code of ethics to be adhered to
- they provide its members with the attitudes that support professional attributes and comprise the essence of “acting like a professional”

# The steps to professionalization

Professionalization of QA

Social Recognition

Professionalization of Agency

# On AGAE's Contribution to the Professional Organization of QA

## Reward Policy

- Prizes were awarded to the three best projects by a Committee formed by representatives from the 10 Universities operating in Andalusia and 3 representatives of AGAE (the agency administered the prizes)
- The institution of prizes dispelled two of the myths surrounding Educational Innovation.
  - One: the assessment of innovation is difficult because of its unique character.
  - Two: consensus in the field of innovation can hinder innovation.

# **On AGAE's Contribution to the Professional Organization of QA Database Management**

- AGAE staff has created database for evaluators of educational innovation
- Each of the 10 Andalusian universities compiled a list of experts on Innovation
- The criteria used for selection were established by AUPA and AGAE
- The database offers free access to all Andalusian Universities who can select experts according to the field of knowledge they need assistance in.

# Conclusions

- The professionalization of QA spurs social recognition of an agency's services.
- The increasing professionalization of QA strengthens an agency's belief in the attitudinal components that support professional attributes.
- An agency may contribute to the professional organization of QA by promoting the strategy of qualification through a reward policy.
- Founding a prize may be one way to attach cultural value to the function of QA and disseminate qualifications.
- Information management (database) may help shape the professional nature of an agency by the logic of trust and credibility.
- The autonomous framework of an agency guarantees the autonomy and objectivity of the information managed.
